14-11-24

Vulnerability :-

i) Open permissions
ii) Unsecure root account
iii) errors.
iv) weak encryption
v) Unsecure protocols
vi) Default settings
vii) Open ports and services.

Third party risks:

i) vendor management
ii) Supply chain
iii) Supply chain
iv) out secured code development
v) Data storage.

understanding vulnerability

i) Data loss
ii) Data breaches
iii) Data exfiltration
iv) Identity threft
v) Financial loss
vi) Damage to reputation
vii) Availbility loss

Security issuse :-

i) misconfiguration
ii) unencrypted credentials
iii) logs and event anomalies
iv) permission issuse
